OVERVIEW

M&E SYSTEM is a web based project monitoring and evaluation software application for building results-based projects and M&E systems to help you track and measure the performance of your projects.

M&E SYSTEM makes project design and monitoring and evaluation easier, quicker and more transparent; you can build M&E systems from scratch and develop standard format project proposals in a matter of hours. The software is so easy to use that you will no longer need to rely on external M&E specialists and IT experts.
